OC-171. Craig, VK4LDX/VK8PDX, will be doing his last visit to **Magnetic Island** between April 17-20th, operating as VK4LDX/P. He'll arrive in the afternoon and hopes to be on air around 0800z using a Spiderbeam tribander on a 10m Spiderbeam mast, along with a vertical and 40m dipole. This location is on a small cliff and has a good water take off to North America on the long and short paths, and Europe on the long path. There is a hill blocking the short path to Europe and JA, but these are the most reliable paths. The Spiderbeam still should be heard on Asia and Europe short path. Craig will do updates during the DXpedition on his Blog page at:

<http://vk4ldxoc171.blogspot.com>

He intends to operate from 2100-0200z and 0600-1600z each day.

SA-095. Operators Cezar/VE3LYC and Dino/CE3PG have embarked on a project to activate **Pupuya Islands** for four days during the second half of November. The operation will take place under the auspices of the Radio Club de Chile. Given the difficulties associated with operating from Pupuya Islands, various contingencies will be considered, including radio equipment, power, transportation, landing, and camping. A Web site will be designed in due course where updates will be posted.

Frank, LA1RSA, will be active as JW1RSA from the JW5E club station in Longyearbyen on Spitsbergen Island (EU-026) between April 9-15th. QSL JW1RSA via LA1RSA.
